PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on expertise in building production-ready AI applications using multiple LLM APIs (Gemini, Grok, OpenAI, DeepSeek). Proven experience in full-stack development with Spring Boot and React, specializing in AI workflow automation, NLP-based systems, and scalable REST API design. Strong problem-solver with end-to-end delivery capabilities in marketing automation, multi-model orchestration, and intelligent database interfaces. **Immediate joiner** ready for impactful AI-driven projects.

TECHNICAL ARSENAL

AI & Machine Learning	Prompt Engineering • LLM API Integration (Gemini, Grok, DeepSeek, OpenAI, Ollama) • Multi-LLM Orchestration • NLP Applications • AI Workflow Automation
Backend Development	Spring Boot • Hibernate • Spring Data JPA • REST API Design • JDBC • Microservices Architecture
Frontend Technologies	React • Redux • HTML5 • CSS3 • Bootstrap • Responsive Design
Programming Languages	Java • Python • JavaScript • C
Databases	MySQL • SQLite • Database Design • Query Optimization
AI Development Tools	Cursor • Windsurf • Antigravity IDE • n8n • Postman • AI-Assisted Development
Python Libraries	Pandas • BeautifulSoup • Requests • NumPy
DevOps & Deployment	Git • Railway • Docker basics • Telegram Bot Integration • API Deployment

PROFESSIONAL EXPERIENCE

Associate AI/ML Engineer

Sept 2024 - Present

Oliware.ai, Pune

- Architected and deployed AI-powered applications integrating **4+ LLM APIs** (Gemini, Grok, DeepSeek, OpenAI) for production use cases
- Engineered scalable **REST APIs** using Spring Boot for AI-driven marketing automation workflows, reducing campaign setup time by 60%
- Developed **NLP-based database query system** enabling natural language to SQL conversion with 85% accuracy
- Built end-to-end full-stack solutions (React + Spring Boot + MySQL) for enterprise AI applications
- Implemented **n8n automation workflows** with dynamic SMTP integration and lead deduplication logic
- Deployed OpenClaw chat interface on Railway with Telegram bot integration for client engagement

Java Developer Intern

June 2024 - March 2025

iTpreneur Edutech

- Developed enterprise Java applications using OOP principles, JDBC, and Spring framework
- Designed and tested **RESTful APIs** with comprehensive Postman validation
- Implemented database-driven features with optimized queries and connection pooling
- Led team of 4-5 developers in full-stack project delivery, ensuring code quality and adherence to best practices

FEATURED PROJECTS

MIRA – AI-Powered Marketing & CMO Agent

Tech Stack: React, Spring Boot, MySQL, Grok API, n8n

- Built intelligent marketing platform with **automated campaign generation** and email sequencing capabilities
- Designed robust REST APIs for campaign management, lead tracking, and analytics dashboard
- Integrated n8n for workflow automation, achieving 70% reduction in manual marketing tasks
- Implemented dynamic content generation using Grok API with context-aware personalization

QueryGPT – Natural Language Database Interface

Tech Stack: Spring Boot, Gemini API, MySQL, Flask

- Engineered NLP-powered system converting natural language to SQL for seamless CRUD operations
- Achieved **85% query accuracy** using Gemini API with custom prompt engineering
- Implemented security layer preventing SQL injection and unauthorized data access

Multi-LLM Response Platform

Tech Stack: Spring Boot, React, OpenAI, Gemini, DeepSeek APIs

- Developed platform for **parallel querying** of multiple LLMs with real-time response comparison
- Implemented backend orchestration with async processing and caching for optimized performance
- Created intuitive UI for side-by-side model comparison and response quality analysis

Intelligent Web Scraping System

Tech Stack: Python, BeautifulSoup, Pandas, Selenium

- Automated large-scale data extraction from 50+ websites with dynamic content handling
- Processed and structured **10,000+ records** with data cleaning and validation pipelines
- Integrated with MySQL for persistent storage and analytical querying

Library Management System

Tech Stack: Spring Boot, Hibernate, Thymeleaf, MySQL

- Developed full-stack application with layered architecture (Controller-Service-DAO pattern)
- Implemented complete CRUD operations with role-based access control
- Designed normalized database schema with JPA entity relationships

EDUCATION

Bachelor of Engineering in Computer Engineering 2024

S. B. Patil College of Engineering, Indapur
Savitribai Phule Pune University — CGPA: 6.78

HSC (12th) – Maharashtra State Board 2020 — 70.31%

SSC (10th) – Maharashtra State Board 2018 — 70.60%

CERTIFICATIONS & TRAINING

Full Stack Java Development Program – iTpreneur 2025

Core Java • Spring Boot • Hibernate • REST APIs • Web Development

Web Development Internship – Internshala 2023

Full-Stack Development • Frontend & Backend Integration

ADDITIONAL INFORMATION

Leadership: Led cross-functional teams of 4-5 developers • Mentored junior developers in Java and Spring Boot

Languages: English, Hindi, Marathi

Location: Permanent Address - Bawada, Indapur, Pune, Maharashtra – 413103

Availability: **Immediate Joiner** — Open to Remote, Hybrid, and On-site Roles
